Surat, Gujarat • +91 98794 49335 • dobariyanisarg@gmail.com • [Nisarg Dobariya](#) | [LinkedIn](#)

## PROFESSIONAL SUMMARY

---

Aspiring VAPT Engineer with hands-on experience in penetration testing, vulnerability assessment, and SOC operations. Skilled in identifying security flaws including misconfigurations, business logic issues, and web vulnerabilities using industry-standard tools.

## EDUCATION

---

|                                                |                |
|------------------------------------------------|----------------|
| CHARUSAT University                            | Anand, Gujarat |
| Bachelor of Technology in Computer Engineering | April 2026     |
| B & B Institute of Technology                  | Anand, Gujarat |
| Diploma in Computer Engineering                | July 2023      |

## EXPERIENCE

---

**SOC ANALYST INTERN – ZERONSEC INDIA PVT. LTD.** Aug 2025 – Jan2026

- Gaining hands-on exposure to SOC operations, security monitoring, log analysis, and SIEM concepts while applying networking fundamentals and working across Linux and Windows environments to analyse traffic flow and strengthen system security knowledge.

**VAPT INTERN – CYBERSECURITY UMBRELLA** Jan 2026 – Present

- Performed end-to-end VAPT in a controlled lab, identifying and exploiting vulnerabilities such as outdated services, weak configurations, and insecure protocols using Nmap, Metasploit, and Kali Linux.
- Solved Capture The Flag (CTF) challenges on platforms like TryHackMe and picoCTF, focusing on enumeration, exploitation, privilege escalation, and strengthening core networking concepts.
- Appeared for the CERT-IN OLPST Level 2 VAPT Exam, gaining hands-on exposure to real-world scenarios including business logic flaws, misconfigurations, and vulnerability assessment methodologies.

## PROJECTS & RESEARCH PAPERS

---

### SIMPLE VULNERABILITY SCANNER

Developed a web tool to detect vulnerabilities like SQL injection and XSS. Automated scanning and reporting to help administrators identify and fix security flaws.

### RESEARCH PAPERS

#### INTRUSION DETECTION IN SMART GRID COMMUNICATION

Analysed key methodologies, challenges, and advancements in smart grid communication. Proposed insights to improve security and efficiency in smart grid networks.

#### SQL INJECTION DISCOVERY AND DETERRENCE TECHNIQUES FOR WEB APPLICATIONS

Co-authored a paper on detecting and preventing SQL injection attacks. Proposed a hybrid approach using LCS matching, runtime monitoring, and intelligent classifiers to enhance detection accuracy and web application security.

## SKILLS

---

- Databases:** SQL, Oracle, Firebase
- Cybersecurity Tools:** Wireshark, Nmap, Hashcat, Hydra, Burpsuite, Metasploit, OpenVAS, Nessus
- Operating Systems:** Kali Linux, Windows, Linux
- Programming Languages:** C, C++, Java, Python, HTML, CSS, PHP, ASP.NET

## CERTIFICATION & ACHIVEMENTS

---

- Joy Of Programming Using Python** (April, 2024 NPTEL)
- MasterCard Cybersecurity Job Simulation** (May, 2025 Forage)
- Deloitte Cybersecurity Job Simulation** (June, 2025 Forage)
